Mfd. by THE GERSON ELECTRICAL MFG. CO.

THE

COLUMNLESS

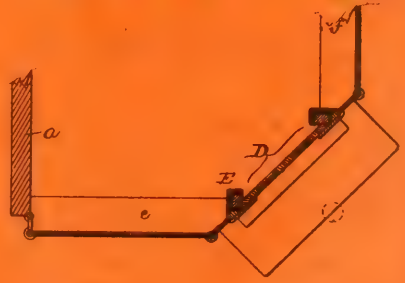
Corner Construction,

PATENTED BY

MATHEW SCHMID,

MAY 10th, 1892.

IN constructing a corner build ng, it will do away with the column support, as now universally used. It will permit the erection of straight steps, platform and door sills,



Allowing a free and open passage, as shown in the diagram.

It will also permit the erection of solid walls or bay windows for the upper floors, and same will prove safer and stronger than with the use of the objectionable column.

Investigation solicited. Estimates and plans cheerfully furnished upon application.

Inventor,
Mathew Schmid

MATHEW SCHMID,

Carpenter, Builder and Contractor

639 North Sixth St.

NOTICE to Architects, Builders and Owners.

I am Sole Patentee, and all infringements will be prosecuted according to law.

CEMENTINE

The New and Only

Waterproof Cement Paint.

FOR BRICK, STONE, CEMENT and other surfaces, particularly for DAMP WALLS inside, and those outside exposed to the weather; for FACTORIES, BREWERIES, SLAUGHTER HOUSES, TANNERIES, OUT HOUSES, STABLES, &c., especially adapted for CELLARS in Dwellings and Buildings of every description.

It is Cheap as Whitewash and far Superior.

CEMENTINE is a powder, which by simple mixing with water, can be applied to any kind of brick, stone or other surface with an ordinary whitewash brush, rendering the surface waterproof and purifying the atmosphere. The space painted with Cementine presents an almost white appearance; with an addition of a little coloring matter, any other shade can be obtained if desired.

CEMENTINE

Can be used on any surface, smooth or rough, it hardens on exposure to moisture, prevents fungous growths and promotes pure air.

It will not scale or crack, no matter how damp or wet the place is. The great value of Cementine has only been discovered about a year ago, yet a great many Brewers and others who have used it, will testify to its merits.

From a Sanitary point of view CEMENTINE

is the best article yet invented; it purifies the air if applied in Cellars and other moist places, where otherwise a damp and mouldy atmosphere prevails.

Cementine is put up in barrels of about 300 lbs. Price by the barrel, 6c. per lb.; in smaller quantities, 8c. per lb. About 2 lbs. is sufficient for a surface of 100 square feet.

DIRECTIONS.

Stir the Cementine into water of natural temperature, in proportion of about 2 lbs. Cementine to every gallon of water: mix well, and let stand until the next day. It will not spoil if allowed to stand any length of time. Apply with an ordinary whitewash brush; one coat only is necessary. It dries immediately.

It is as Cheap as Whitewash and far Superior.

All orders promptly executed if addressed to

CEMENTINE MANUFACTURING WORKS,

JOHN C. OETERS, Proprietor,

1242 North 31st Street, Philadelphia.

GUARANTORS' LIABILITY INDEMNITY CO, OF PENNSYLVANIA (THE), 435 Chestnut. The Employers' Liability Indemnity Contract issued by The Guarantors' Liability Indemnity Company of Pennsylvania indemnifies the principal against any sums he may be called upon to pay on account of claims of employees for accidental injury, that is to say, The Guarantors' Liability Indemnity Company of Pennsylvania undertake for the premium to dispose of such claim for and on behalf of the assured, and should such disposition involve law suits, investigation expenses, etc., The Guarantors assume such expense in addition to paying the damages awarded or agreed upon within the limits expressed in the contract. They also issue policies covering Public Liability Indemnity Insurance, Steam Boiler Inspection and Insurance, Elevator Inspection and Insurance, Team Liability Insurance, Automatic Sprinkler Inspection and Indemnity Against Loss by Accidental Discharge of same. The above, all combined, if required, under our Perfection Blanket Policy—and not issued by any other company. Full information will be furnished upon application.

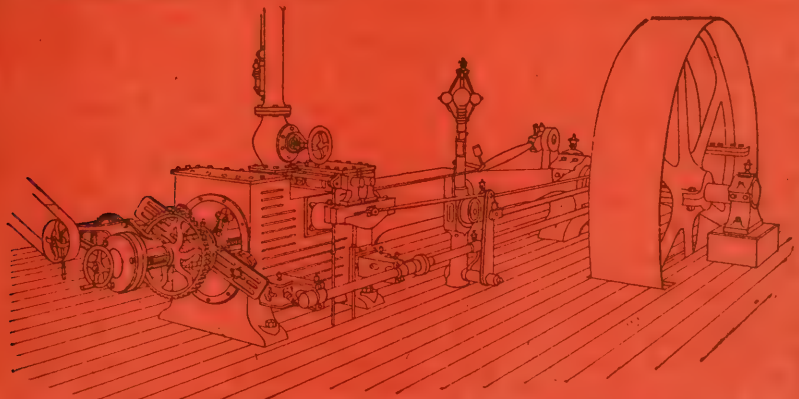
TELEPHONE 3048.

HENRY C. AYER,

GENERAL MACHINIST,

PHILADELPHIA, PA.



OFFICE: No. 919 Betz Building.

I HAVE NEW AND MODERN BORING MACHINERY AND RE-BORE IN THEIR PRESENT POSITION all makes and sizes of Steam Engine Cylinders, Pumps, Steam Hammers, Blowing Engines, Air Compressors, Mining and Hoisting Engines, Corliss Valves, Hydraulic and Steam Hoists, Heavy Housings, Large Wheels, &c.

I have superior facilities for repairing speedily and accurately all makes and sizes of Steam Engines, making Corliss and Green Engines a Specialty.

I have a Special Apparatus for facing off Valve Seats of Stationary Engines in position.

☞Sole Proprietor of the ***H. C. A. SELF-ADJUSTING CYLINDER PACKING,*** which is unequalled as a coal and oil saver, giving a marked increase in power, with a minimum degree of friction in cylinder. For Steam, Water, Air, Oil and Ammonia Pumps it has no equal. I also furnish, when desired, a Spring Piston Packing, which has been in very general use for several years, giving good satisfaction.

This cut shows my Portable Cylinder Boring Machine, re-boring in its position the cylinder of a Green Engine.

I make a specialty of ***REPAIRING ICE MACHINES, PUMPS*** and ***STEAM ENGINES*** in Breweries. On ***Break-Down Jobs*** I make a *special effort* to start up steam plants at *earliest possible moment*, and work night and day in order that my customers may lose as *little time* as possible.

GENERAL MACHINE AND ELECTRICAL WORK, BLACKSMITHING, PATTERN-MAKING, ENGINES INDICATED.

☞All work guaranteed. Correspondence solicited. Estimates cheerfully given. Catalogue on application.

EMERY WHEEL MACHINE.

GLAZING MACHINE, SEASONING MACHINE, PIN WHEELS, LIME AND TAN PADDLE, SKINS BREAKING MACHINE, VENTILATING FANS AND DRYING ROOM OUTFITS.

Special Attention Given to Repairing of Leather Machinery.

The above cut represents my Patent Emery Wheel Machine, which is pronounced by parties now running them to be highly useful for emerying the fleshy part of dry or damp skins of morocco. A large demand for this machine has been created—it being extensively employed in this city and various parts of the country by morocco manufacturers. Wherever used the merits of this machine are readily conceded on account of its many advantages not possessed by the overhand wheel, as it will emery faster and do much better work than the latter, and it is the only machine that will emery the skins dry or damp with the flesh side up—a boy being able to emery from 30 to 60 doz. skins per day of 10 hours—and also to emery the skins to an even thickness, which all morocco manufacturers are fully aware is a very important advantage.

THE ANTI-RANCIDINE MFG. CO.,

A. F. RIESER, President and Manager of Co.,

415 Newmarket Street, Philadelphia, Pa., U. S. A.

ANTI-RANCIDINE. The powerful neutralizer of all rancid or rank, musty and sour taste and smell in milk, cream and butter. After neutralization it acts as the most efficacious preservative. Keep apace with the times and use Anti-Rancidine, then you are able to compete with anyone in the business. Cut down your ice bills by using Anti-Rancidine. We answer all letters desiring information.

THE

COLUMNLESS

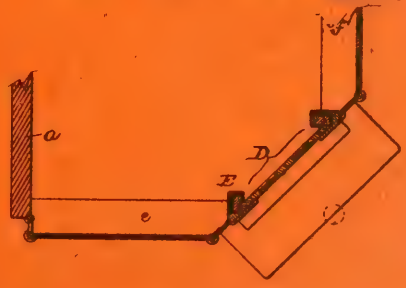
Corner Construction,

PATENTED BY

MATHEW SCHMID,

MAY 10th, 1892

IN constructing a corner building, it will do away with the column support, as now universally used. It will permit the erection of straight steps, platform and door sills,



Allowing a free and open passage, as shown in the diagram.

It will also permit the erection of solid walls or bay windows for the upper floors, and same will prove safer and stronger than with the use of the objectionable column.

Investigation solicited. Estimates and plans cheerfully furnished upon application.

Inve
Mathe Schm

MATHEW SCHMID,

Carpenter, Builder and Contractor

639 North Sixth St.

CEMENTINE

The New and Only

Waterproof Cement Paint.

FOR BRICK, STONE, CEMENT and other surfaces, particularly for DAMP WALLS inside, and those outside exposed to the weather; for FACTORIES, BREWERIES, SLAUGHTER HOUSES, TANNERIES, OUT HOUSES, STABLES, &c., especially adapted for CELLARS in Dwellings and Buildings of every description.

It is Cheap as Whitewash and far Superior.

CEMENTINE is a powder, which by simple mixing with water, can be applied to any kind of brick, stone or other surface with an ordinary whitewash brush, rendering the surface waterproof and purifying the atmosphere. The space painted with Cementine presents an almost white appearance; with an addition of a little coloring matter, any other shade can be obtained if desired.

CEMENTINE

Can be used on any surface, smooth or rough, it hardens on exposure to moisture, prevents fungous growths and promotes pure air.

It will not scale or crack, no matter how damp or wet the place is. The great value of Cementine has only been discovered about a year ago, yet a great many Brewers and others who have used it, will testify to its merits.

From a Sanitary point of view CEMENTINE

is the best article yet invented; it purifies the air if applied in Cellars and other moist places, where otherwise a damp and mouldy atmosphere prevails.

Cementine is put up in barrels of about 300 lbs. Price by the barrel, 6c. per lb.; in smaller quantities, 8c. per lb. About 2 lbs. is sufficient for a surface of 100 square feet.

DIRECTIONS.

Stir the Cementine into water of natural temperature, in proportion of about 2 lbs. Cementine to every gallon of water: mix well, and let stand until the next day. It will not spoil if allowed to stand any length of time. Apply with an ordinary whitewash brush; one coat only is necessary. It dries immediately.

It is as Cheap as Whitewash and far Superior.

All orders promptly executed if addressed to

CEMENTINE MANUFACTURING WORKS,

JOHN C. OETERS, Proprietor,

EXHIBIT AND SAMPLES AT BUILDERS' EXCHANGE.

1242 North 31st Street, Philadelphia.

DO YOU SEND OUT CIRCULARS?

LAW OFFICES

.... OF ....

J. Walter Douglass,

PATENTS AND PATENT CAUSES.

Philadelphia, 914 Walnut Street.

Washington, 615 Seventh Street.

I. Patent Soliciting Department.

In this department Patents in the different Countries are procured, and Trade Marks, Designs, Copyrights and Labels obtained. Contracts, Assignments and other Documents prepared. Opinions as to scope and validity of patents given.

N. B.—Special attention given to Textile and Electrical matters and causes.

All foreign cases are prepared in the different languages and prosecuted from the Main Office in Philadelphia.

II. Draughting Department.

In this department is employed a skilled Engineer and a corps of assistants, who prepare drawings for inventions, working plans for the erection of machinery and drawings for the development of crude ideas for their protection by patents in this Country and the Foreign Countries.

III. Collection, Annuity and Working Department.

In this department attention is given to the collection of royalties, payment of annuities, the working of patents for inventions in the foreign countries, and the preparation of assignments, contracts and other instruments of writing in the different languages.

IV. Patent Sales Department.

In this department patents for inventions in this country and the foreign countries are investigated and reports furnished as to the novelty and validity thereof, sales effected and companies organized.

Cable Address—"Wooline," Philadelphia. *Telephone No. 3625.*

LAW OFFICES

.... OF ....

J. Walter Douglass,

PATENTS AND PATENT CAUSES.

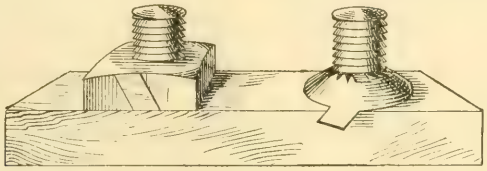
Philadelphia, 914 Walnut Street.

Washington, 615 Seventh Street.

V. Patent Soliciting Instalment Department.

In this department inventions are protected on the instalment plan. The inventor is only required to furnish a *sketch or a brief description* of the main features of the invention. The mechanic or machinist can obtain a patent through this office without in the first instance seeking capital to aid him to do so.

VI. The Legal Department.



In this department attention is given to Interferences, Rejected Cases, Appeals and Matters before the Government Departments at Washington, D. C.

Remittances by non-resident Inventors should be made by P. O. Order or Bank Draft on Philadelphia.

★ *PATENT NUT LOCKS.*

WALSH JAMES JR, 444 N 5th

The Little Giant Nut Lock.

PATENTS GRANTED 1894.

This article covers the largest field of any mechanical branch. Cost to manufacture, ⅛ of one cent. Mechanical skill required. A Nut Lock made without weakening or destroying Nut or Bolt—what science has looked for all these years. Complete in a simple bowled flange of iron, 1-16 thick or more, as required, having cross semi-circled teeth like a vise, as seen in the drawing, etc.

EXPLANATION.

A bowled flange with its opening to size of bolt. In screwing the nut home, you are drawing the bolt and also flattening the flange, which makes bolt-hole smaller to overlap its teeth into the bolt screw like a vise. The bolt being fastened when the nut is home, you turn up the two small fingers against the nut, locking both completely. If for use again, turn fingers down, screw off the nut and invert flange, with a tool, etc., you can lock any bolt with your simple flange with you to the size of the bolt that will withstand any jarring or vibration of machinery, etc. Also, in its use, is a good Wagon Nut Lock, which is taken apart in a moment by raising the spring that also holds the nut; this is not bowled, etc., etc.

TO CAPITALISTS. $5,000 with 10 per cent. Royalty, will purchase United States Patents. Also European Patents for sale.

"QUAKER CITY" HOPPER.

Hospitals, Schoolhouses, Railroad Stations and Public Institutions should be furnished with water-closets that have a large area of water, can be readily cleaned out in case the bowl becomes filled with foreign matter, and can be thoroughly flushed out.

The "Quaker City" Hopper possesses these advantages. It is an all Earthenware Closet, with the Trap and Bowl in one piece, holding a considerable body of water, and with a seal of greater depth than is found in an ordinary closet. There is a full-sized waterway from the Bowl to the Soil-pipe, so that a stoppage in the Trap is impossible. The illustration shows the Closet connected with a Soil-pipe fitting in the wall, but connection can be made with soil-pipe in the floor when desired.

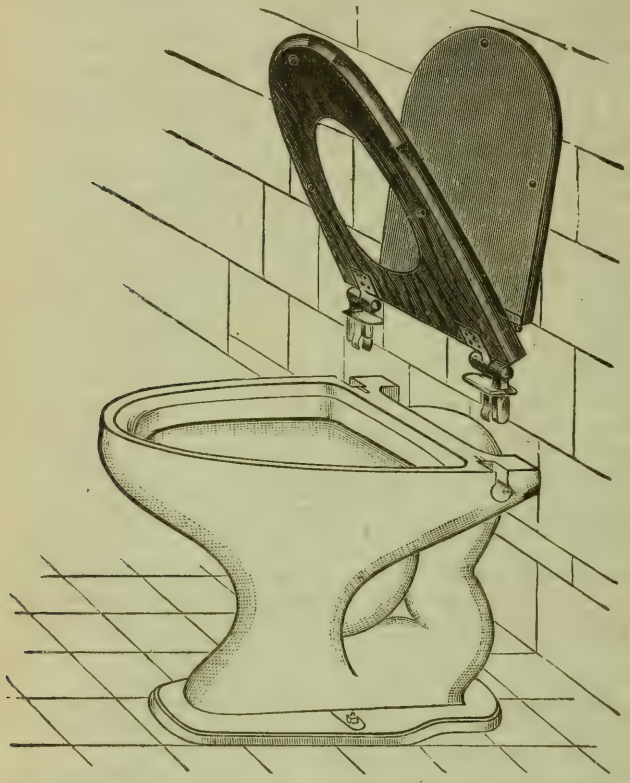
HAINES, JONES & CADBURY CO.,

MANUFACTURERS OF



High-Class Plumbing Goods

No. 1136 Ridge Avenue, Philadelphia.

THE "ALBO"

Detachable Seat and Cover.

PATENTED SEPTEMBER 11, 1894.

It is recognized by experts conversant with sanitary matters, that every fixture must be as near "all open" as it is possible to make it. With the "Albo" Detachable Seat we not only do away with the unnecessary and dirt-absorbing woodwork at back of closet going against wall, but also present a seat in every way a perfect sanitary success.

The "Albo" Seat allows of an "all open" space at back between closet and wall, thus giving free access around the bowl at all times. Another great advantage which the "Albo" Seat possesses is, that it can be entirely detached from the earthenware by simply lifting it up, so that all surfaces of the seat and bowl can be kept perfectly sweet and clean.

Printers

1234-36
North Fourth Street
Philadelphia

Our work is not duplicated
in the ordinary Printing
Office.

You are sometimes impressed by the
appearance of other folks' Printing.
Should not your own convey this desired effect?
Try our work—it will pay you.

We give special attention to producing
High-Grade Effects in Half-Tone Work,
Commercial or Illustrated.
Designs furnished—competent artists.

ROXBOROUGH

In the Twenty-First Ward of the City of Philadelphia

As a Place of Residence.

The Twenty-First Ward is practically divided into two parts, the industrial section, known as Manayunk, and the residence section, known as **ROXBOROUGH.** The latter is located on a prominence overlooking both the Schuylkill and Wissahickon Valleys, and is said to be the highest point between Philadelphia and Reading.

Good Natural Drainage Invariably Brings Good Health,

and in this respect Roxborough excels all other suburbs. Roxborough (being a part of the city) enjoys all city conveniences, such as

Electric Lights,
Gas and Water,
Paved Streets, and
Electric Street Cars,

(heated in winter) and running to and from the Reading and Penna. Railroad Stations at both Wissahickon and Manayunk bring Roxborough within 30 minutes' ride of either the Reading Terminal or the Broad St. Station. The car-fare is reasonable and the Roxborough resident, after performing his daily toil, doesn't hold to a strap in order to reach home, but enjoys a comfortable seat in well lighted and heated cars, all the way to his door. If, therefore, you wish to combine the refreshing and health-giving air of the country with superior city conveniences, come to Roxborough. Only 7 miles from Market Street. For further particulars, apply to

OLIVER S. KEELY,

Manayunk Real Estate and Law Building,

4370 MAIN ST., MANAYUNK. PHILADELPHIA.
